EDUCATION

Panimalar Engineering College, Chennai 2024 – 2028
B.E. Computer Science and Engineering | CGPA: 8.7 / 10 Pre-Final Year

EXPERIENCE

Frontend Developer Intern – NIELIT Chennai Jan. 2026 – Mar. 2026
- Built responsive web pages using HTML5, CSS3, and JavaScript; improved cross-device compatibility across all major browsers.
- Delivered a fully functional movie listing website with structured, user-friendly UI, applying Flexbox/Grid and semantic HTML best practices.
- Strengthened API integration and responsive design skills through iterative builds, reducing layout defects by redesigning component hierarchy.

Python Developer Intern – Cognifyz Technologies (Remote) Apr. 2025 – May 2025
- Developed 5+ Python mini-projects covering automation, scripting, and data processing.
- Built a web scraping pipeline using BeautifulSoup and Requests to extract, clean, and structure data from multiple online sources.
- Improved debugging, logical reasoning, and version control discipline through Git-managed, hands-on development tasks.

PROJECTS

Smart Water Leakage Detection & Control System *ESP8266 · Flutter · Firebase · IoT*
- Engineered an IoT system using ESP8266 sensors and Firebase real-time database to detect leaks and trigger instant mobile alerts.
- Built a Flutter mobile app enabling remote valve control and automated maintenance reports, reducing manual monitoring effort.

NIZHAL – AI-Powered Image Theft Prevention System *AI · Perceptual Hashing · Watermarking*
- Designed an AI pipeline using perceptual hashing and invisible watermarking to detect unauthorized image usage across web platforms.
- Applied OOP design principles and image processing algorithms to identify tampered or redistributed assets with high accuracy.

PDF Analyzer / RAG Chatbot *Python · LLM · RAG · Vector DB*
- Built a Retrieval-Augmented Generation (RAG) chatbot that parses uploaded PDFs and delivers context-aware answers via LLM API integration.
- Implemented document chunking, vector embeddings, and similarity search to optimize query relevance and minimize hallucinations.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL (MySQL)
Web Technologies: HTML5, CSS3, JavaScript, Flutter
Databases: MySQL, Firebase, Oracle
Developer Tools: Git, GitHub, VS Code, Eclipse, Jupyter Notebook
Frameworks & Technologies: REST APIs, IoT (ESP8266), RAG, LLM Integration, Web Scraping
Core Concepts: Data Structures & Algorithms, OOP, Debugging, Problem Solving, Agile, SDLC, Version Control

ACHIEVEMENTS & CERTIFICATIONS

- IEEE WIE Hackathon Finalist – Recognized among top teams; organized by IEEE & Rajalakshmi Engineering College.
- Ideathon 2024 Finalist – Selected among finalists for innovative problem-solving and technical presentation skills.
- International Conference 2024 – Presented AquaFix, an IoT-based water management solution, at an academic conference.
- SWAYAM – Programming in Python (98%) | NPTEL – Database Management Systems, Programming In Java
- Debugging Contest Participation, Saveetha Engg. College.

LEADERSHIP & ACTIVITIES

- Member, Coder's Forum – Panimalar Engineering College: Active in technical discussions, coding events, and developer meetups.
- Member, LeetCoders Club – Engaged in competitive programming, algorithm challenges, and peer knowledge-sharing sessions.
- Hackathons & Coding Contests – Competed in multiple inter-college hackathons and debugging contests using DSA and software development skills.
